

Preferred
EPC and O&M
Partner for Oil &
Gas Infrastructure

About SOPAN

In 2001, SOPAN is established by Energy professionals as a Project Management company with strong focus on customer requirements. SOPAN has emerged as a strong player in the field of EPC Projects, Services and Critical Equipment & Systems supply to Engineering Industries. With the success achieved over the years, we have also taken our expertise to sectors such as Public Infrastructure, Water, Solar, Hydrogen etc. with high focus on providing cost-effective, tailor-made and technologically driven innovative solutions to our clients.

At SOPAN, we specialize in EPC (Engineering, Procurement, Construction) solutions across the entire spectrum of Upstream, Midstream, and Downstream Oil and Gas facilities. Our comprehensive services encompass Design, Engineering, Procurement, Installation, Testing, and Commissioning, all delivered on a turnkey (LSTK) basis.

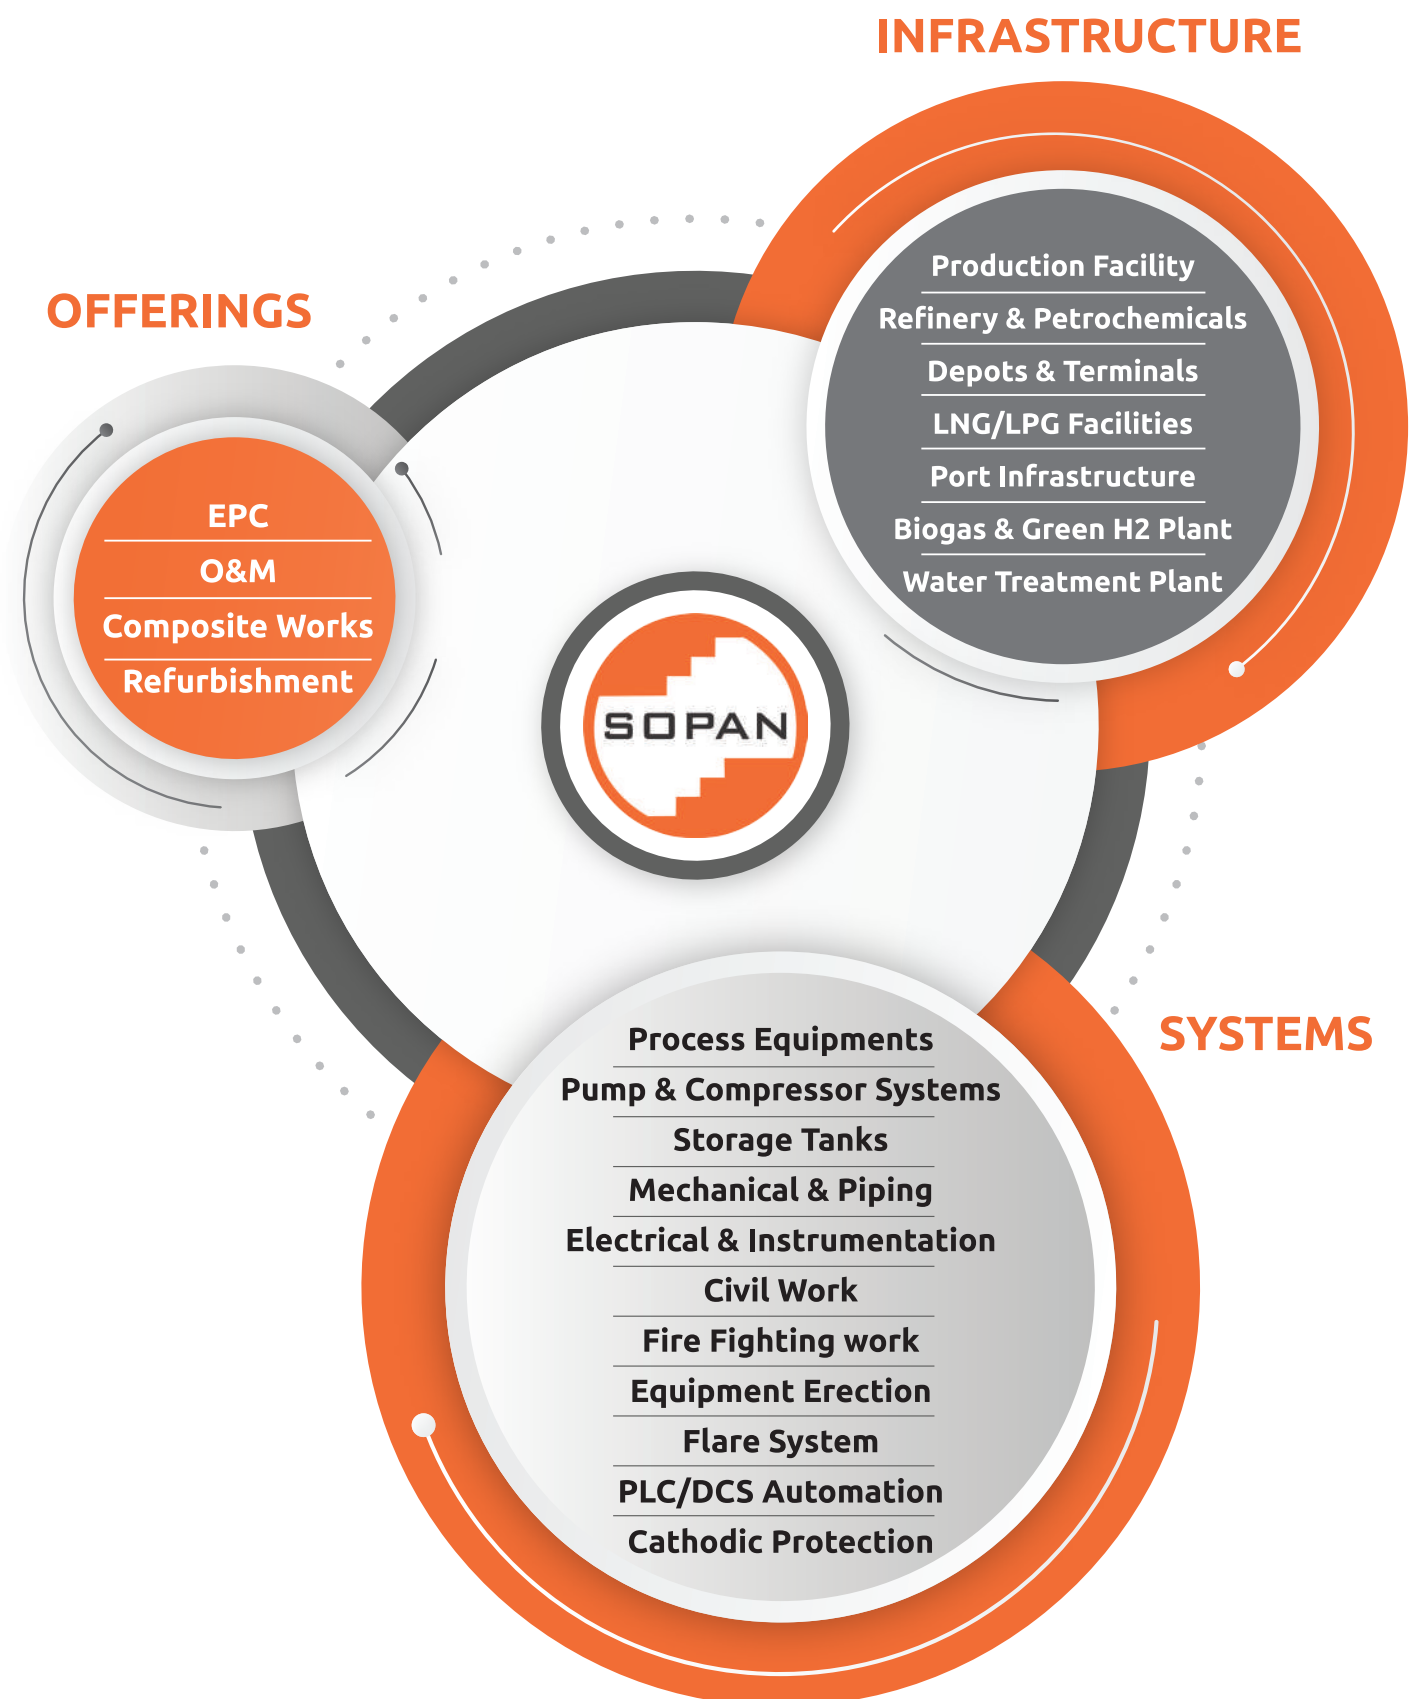

We, at Sopan, strongly believe that Success lies in Service and deliver High Quality, Cost-Effective and Timely solutions aligned with customer requirements.

Some of our key clientele

- Dedicated team of over 2500 professionals, many boasting over three decades of industry expertise, we bring unparalleled knowledge and skill to every project.
- Our roster also includes esteemed advisors from renowned companies like SHELL, PDO, ONGC, IOCL etc. ensuring cutting-edge insights.
- Our comprehensive equipment inventory, including owned and leased assets, empowers us to tackle Oil and Gas construction projects with efficiency and precision.
- Sopan has been awarded Leading Mid-Corporate Business Excellence Award 2023 by Dun & Bradstreet
- Recipient of Prestigious awards for Safety from:
 - Bharat Petroleum Corporation Limited (BPCL)
 - Indian Oil Corporation Limited (IOCL)
 - Vedanta Cairn
 - Adani Gas
 - Tata Motors Limited
 - Worley
- 3 world-class manufacturing facilities aggregating 200,000+ square feet located near Ahmedabad and Pune, having ISO 9001:2015 certification

Project & Service Portfolio

KEY PROJECTS: Oil & Gas Production Facilities

Onshore Oil processing and collecting station

EPC of Oil processing and collecting station including supply of Separator, bath heater, Gas filtration & metering, flare system, well manifolds, Diesel/effluent/condensate storage & transfer facility

Gas Gathering Station for Coal Bed Methane

EPC of Gas processing system including group separators, Compressors, Vessels Gas Dehydration System Entire fire-fighting system Instrument/ Air Plant System Flare System Associated multi-disciplinary work

KEY PROJECTS: LNG & LPG Facility

LNG Truck Loading Project

LNG Truck loading facility with LNG Cryogenic piping & valves upto 16" & Insulation, LNG Drain Pump & Vessel, Fire-fighting System, allied Civil, Electrical, Instrumentation, Utility works.

KEY PROJECTS: Refinery & Petrochemical Complexes

Revamping of Atmospheric Unit & Construction of Wagon/Truck Loading Facilities

Capacity augmentation of Atmospheric Unit including Column modification work, Equipment Erection work and other composite work. Construction of Wagon & Truck loading facility on LSTK EPC basis. Total Equipment Erection ~ 2000 MT, Piping ~ 2 Lakh inch dia.

Composite work for Storage tank Integration in SRU

Composite Work in Sulphur Recovery Unit for Interconnecting Storage Tanks involving Civil & Structural, Piping, Mechanical, Process Safety, Electrical And Instrumentation Works.

LPG Import Terminal

Provided Fire Fighting system for LPG Loading facility on LSTK EPC Basis with associated Pumps, Foam System, Water Monitors, F & G System

KEY PROJECTS: Oil & Gas Terminal/Depot

Oil Marketing Depot

Engineering, Procurement, Construction of Product Tankages, Fire Water Tanks, Product & Fire water piping, Product Pumps and entire electrical system including Transformer, DG set, PMCC Panel and associated Civil Works

Dispatch, Pumping Stations

Composite construction of multiple pumping & receipt stations required as part of HPCL's Pipeline augmentation project including Detailed Engineering, Procurement, Construction, Installation & Commissioning of inter-disciplinary systems.

KEY PROJECTS: Bio Gas & Water Treatment Plant

CBG Plant

EPC of Compressed Bio Gas Plant of 200 TPD with associated Piping, Electrical, Instrumentation & civil work.

Produced Water Treatment Plant

Augmenting capacity of PWT train from 520 KBWPD to 920 KBWPD on LSTK EPC Basis

Sopan's Operation & Maintenance (O&M) division:

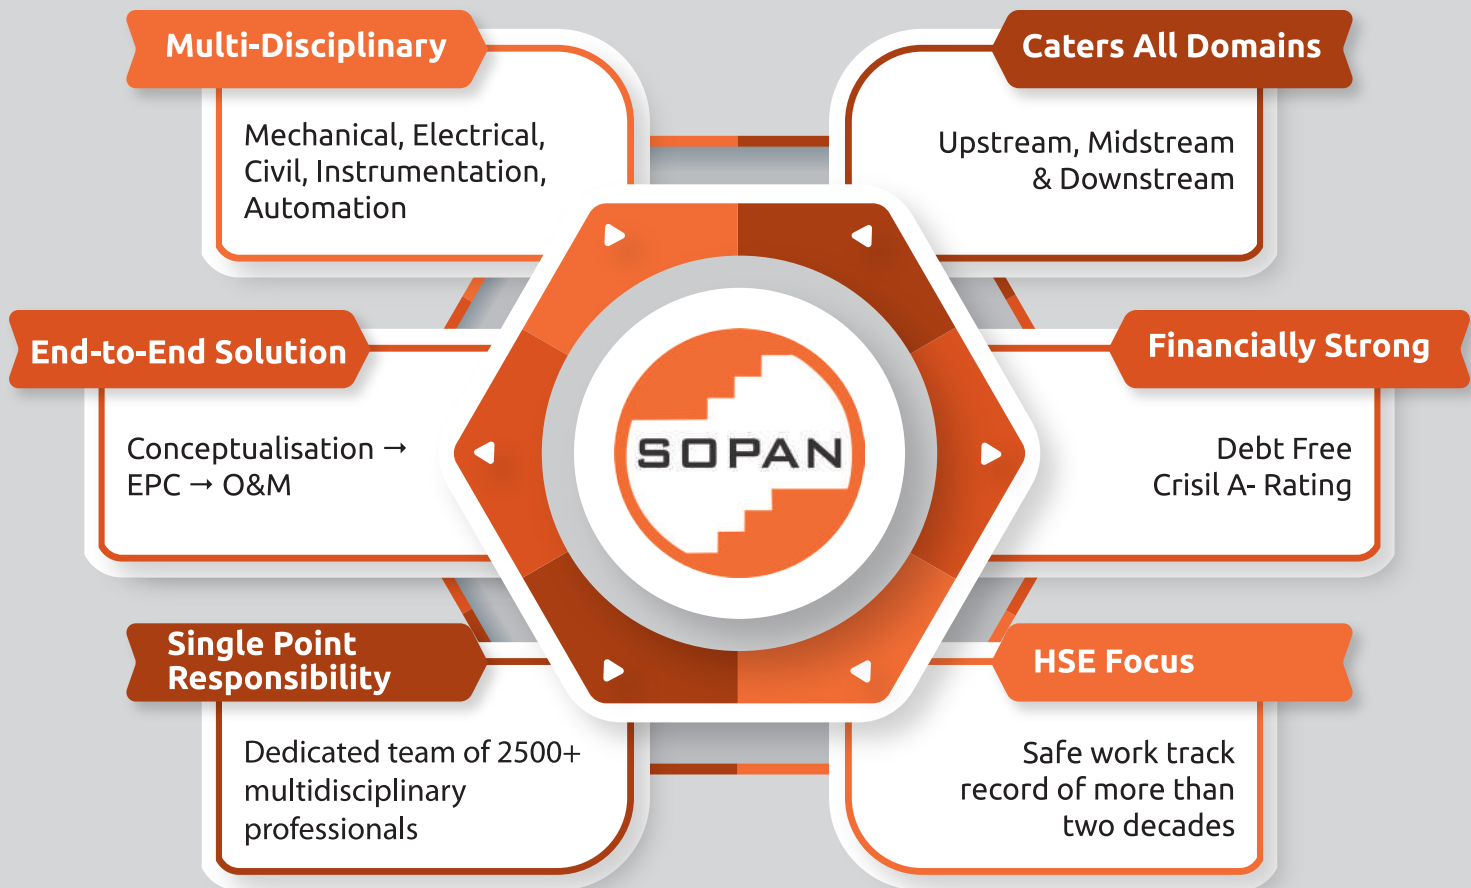

With over two decades, SOPAN has been delivering Stellar O&M services covering a diverse range of Facilities, including Gas Gathering Stations, Oil Marketing Terminals, Compressor Stations, Cross Country Pipelines, and more. Our experienced team manages all aspects of operation and maintenance, ensuring safe and efficient operations.

We specialize in Reciprocating Gas Compressor O&M, successfully overseeing a significant number of compressors. Additionally, we have maintained over 4000 km of cross country pipelines, emphasizing safety and rapid response to emergencies.

Our services extend to Oil & Gas Production & Process Facilities, City Gas Distribution Infrastructure, and CNG Stations with present portfolio of handling of more than 750+ Compressors and other Oil & Gas Facilities. We ensure asset reliability and integrity, offering preventive and predictive maintenance, wet leasing, and comprehensive testing and fabrication services.

WHY CHOOSE SOPAN FOR YOUR NEXT OIL & GAS INFRASTRUCTURE PROJECT

SOPAN O&M COMPANY PVT LTD
